

CLIENTS ACCESS TO THE OFFICES OF THE MINISTRY OF THE INTERIOR OF THE CZECH REPUBLIC AS OF JULY 1ST, 2021

Clients arriving from **countries with a low risk** of infection can visit the Asylum and Migration Policy Department **without any restrictions**.

Clients arriving from countries with a **high and very high risk** of infection must undergo an RT-PCR test **within 5 days of entering** the Czech Republic.

Clients arriving from countries with an **extreme risk** of infection must then undergo this test no sooner **than 10 days after entering** the territory

A visit of the Mol office will be enabled if clients will be able to prove (by a written confirmation) that the RT-PCR test has been undergone in the territory of the Czech Republic in a time stated above and with the negative result.

EU citizens or foreigners from countries at medium and high risk of infection can present a vaccination or proof of having had the disease less than 180 days ago instead of a test.

WHAT TO DO IF I AM POSITIVE?

In case of a positive result of the RT-PCR test, please, do not arrive at the Mol office until the very end of the ordered quarantine measure.

WHAT IF I WILL NOT FULFILL THE REPORTING OBLIGATION DUE TO THE TEST?

If you fail to comply with the reporting obligation due to the protection measure (i. e. you will not report the arrival to the territory within 3 working days from the date of entry), **no sanction will be imposed on you**. However, you must subsequently fulfill this obligation in person as soon as possible.

Make an appointment in advance to visit the Mol office and use only

respirator or disposable medical mask (surgical mask).

Persons with other than the stated protection of the mouth and nose will not be checked in, as well as persons who come to the Mol office before the end of any quarantine measure.

Thank you for your responsible approach during these unprecedented times.
